

Cupido is a mirror that softens the gaze and reflects it back into the space.

The frame appears as a welcoming form, soft to the eye, designed to interact with its surroundings with quiet elegance. Light, almost woven pleats animate its surface, setting the rhythm of the piece and enhancing its depth.

At its center, the mirror reflects and expands the surrounding space, amplifying its atmosphere and presence.

Poised between light and shadow, Cupido reveals an intimate and refined character, evoking a sense of contemporary comfort, where design meets tactile sensibility and decoration becomes a subtle gesture.
